---

### Work History

#### Freelance Web Developer

*AWDev, London* | **Sept 2024 – present**

- Designed and developed user interfaces across full project life cycles based on client requirements.
- Acted as the main client liaison, implementing design visions and feedback effectively.
- Tested and debugged web applications; ensured cross-browser and mobile responsiveness.
- Integrated up-to-date web technologies to deliver modern, innovative solutions.
- Maintained clean, modular codebases and performed ongoing updates and optimizations.

#### Security Professional

*G4S, London* | **Sept 2021 – May 2025**

- Developed a key-card tracking system, improving on-site employee data accuracy by 15%.
- Led digital transformation by migrating paper-based systems to software, reducing waste and increasing efficiency.
- Enhanced communication tools and scheduling systems, boosting workflow efficiency by 24%.

#### Biomedical Researcher

*Stack Diagnostics / 54Gene UK LTD, London* | **Jun 2017 – Jan 2024**

- Designed UI dashboards for seven research teams to access large datasets efficiently.
- Acted as liaison between design, finance, and lab teams—ensuring stakeholder alignment.
- Automated lab and data workflows using Python and Bash, improving productivity by 23%.
- Developed a robust internal tool to streamline cross-departmental procedures.
- Wrote maintainable front-end code for the company’s public landing page.

---

## Education

**BSc (Hons), Biology**

**Open University, Milton Keynes** | **Dec 2017**

---
